Assignment 1:

Html Code:

```html
<html>
    <head>
        <title>Basic CSS Introduction</title>
        <link  rel="stylesheet" href="Asnt1.css"></link>
    </head>
    <body>
        <div class="blueBox">
            <h1>CSS example!</h1>
            <br/>
            <p>This is a paragraph</p>
            <p>This is a second paragraph</p>
        </div>
    </body>
</html>
```
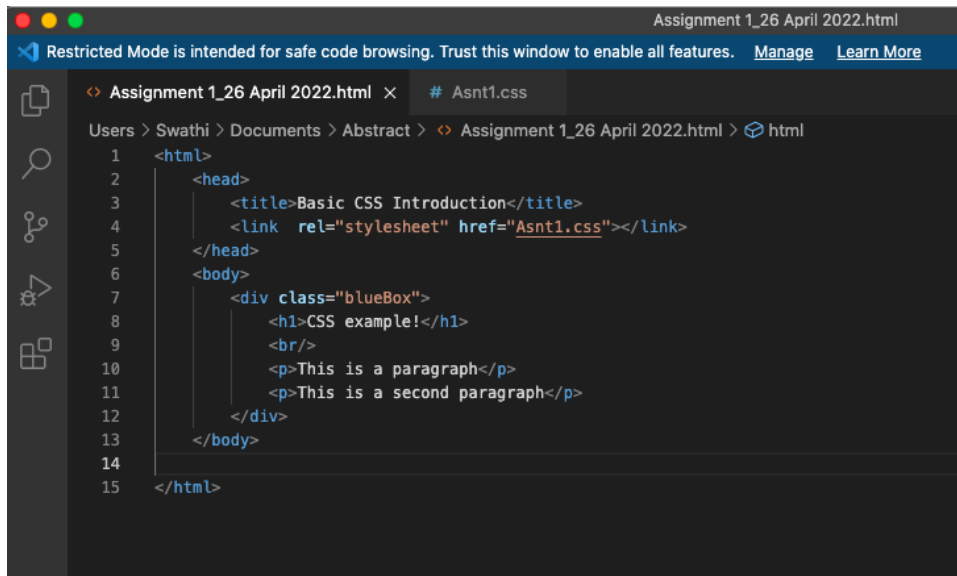

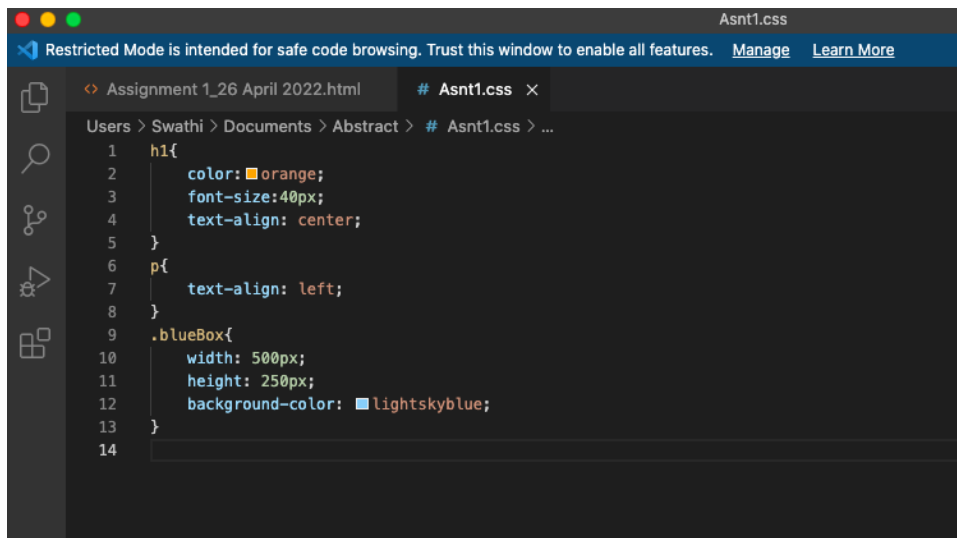

CSS Code:
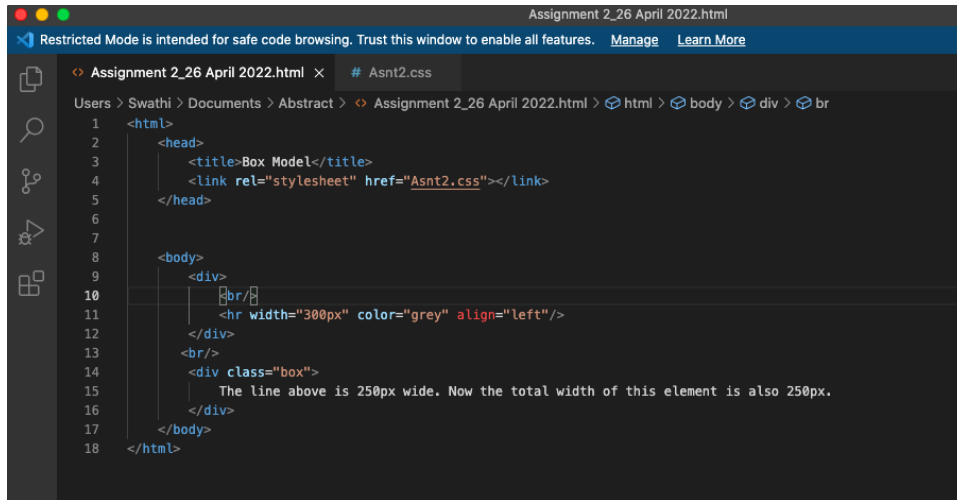

```css
h1{
    color: orange;
    font-size:40px;
    text-align: center;
}
p{
    text-align: left;
}
.blueBox{
    width: 500px;
    height: 250px;
    background-color: lightskyblue;
}
```

Output:

Assignment 2:

## HTML Code:

```html
<html>
    <head>
        <title>Box Model</title>
        <link rel="stylesheet" href="Asnt2.css"></link>
    </head>

    <body>
        <div>
            <br/>
            <hr width="300px" color="grey" align="left"/>
        </div>
        <br/>
        <div class="box">
            The line above is 250px wide. Now the total width of this element is also 250px.
        </div>
    </body>
</html>
```

CSS Code:

```css
.box{

    background-color: pink;
    width: 250px;
    height:75px;
    border:8px solid grey;

    padding-top:10px;
    padding-left: 10px;
    padding-right: 10px;
    padding-bottom: 10px;

    text-align: left;
    font-size:18px;

}
```

Output:

The line above is 250px wide.
Now the total width of this
element is also 250px.

Assignment 3:

HTML Code:

```html
<html>
    <head>
        <title>Registration Form</title>
        <link rel="stylesheet" href="Asnt3.css"></link>
    </head>
    <body>
        <form action="https://google.com" class="box">
            <table>
                <caption><h2>RegistrationLogin</h2></caption>
                <tr>
                    <td class="upperCase">
                        First Name
                    </td>
                    <td>
                        <input name="firstName" type="text" placeholder="Enter Your First Name" required/>
                    </td>
                </tr>
                <tr>
                    <td class="upperCase">
                        Last Name
                    </td>
                    <td>
                        <input name="lastName" type="text" placeholder="Enter Your Last Name" required/>
                    </td>
                </tr>
                <tr>
                    <td class="upperCase">
                        User Name
                    </td>
                    <td>
                        <input name="userName" type="text" required/>@indian.com

                    </td>
                </tr>
                <tr>
                    <td class="upperCase">
                        Password
                    </td>
                    <td>
                        <input name="passWrd" type="password" placeholder="Atleast 6 characters" minlength="6"/>
                    </td>
                </tr>
```

```html
                    <tr>
                        <td class="smallSizeText" colspan="2">Password not entered</td>
                    </tr>
                    <tr>
                        <td colspan="2">
                            <hr align="left" width="140px" height="80px" color="lightgrey">
                        </td>
                    </tr>
                    <tr>
                        <td class="upperCase">
                            Confirm Password
                        </td>
                        <td>
                            <input name="confirmPasswrd" type="password" required minlength="6"/>
                        </td>
                    </tr>
                    <tr>
                        <td class="upperCase">
